VIETNAM NATIONAL UNIVERSITY OF HO CHI MINH CITY
THE INTERNATIONAL UNIVERSITY
SCHOOL OF COMPUTER SCIENCE AND ENGINEERING

Web Application Development

Laboratory 1

Lê Huỳnh Thiện – ITCSIU23036

Date Performed: 04/03/2026
Date Submitted: 04/03/2026

Instructor: Tran Khai Minh

Exercise 1

Code

HTML

```
<!DOCTYPE html>
<html lang="en">

<hr>
<h1>Lê Huỳnh Thiện</h1>
<h2>Junior Frontend Developer</h2>
<p>343/25 Sư Vạn Hạnh, phường Hoà Hưng, TPHCM<br>
    (+84) 853826638<br>
    lehuynhthien05@gmail.com
</p>

<h2>Skills</h2>
<p>HTML, CSS, JavaScript, Accessibility, Figma to Design,
Responsive Web Design, Technical Writing, Presentation</p>

<h2>Education</h2>
<h4>International University, VNU HCMC, BSc. Computer Science</h4>
<p>August 2023 to August 2027</p>
<p>GPA: 3.60/4.00</p>
<p>Google Developer Groups - at International University</p>
<p>Advisor</p>

<h2>Experience</h2>
<h4>Company A, Hoa Hung Ward, HCMC - Back-End Web Developer</h4>
<p>February 2026 to June 2026</p>
<ul>
    <li>Developed and built the business logic for the whole
system</li>
    <li>Optimized website performance</li>
</ul>
<p>Skills: Typescript, Javascript, Java - Springboot</p>

<h4>Company B, Tan Hoa Ward, HCMC - Fullstack Developer</h4>
<p>September 2026 to January 2027</p>
<ul>
    <li>Assisted in the development and execution of automated
test scripts</li>
    <li>Assisted in running automated tests in a CI/CD
pipeline</li>
```

```
    <li>Conducted functional and smoke testing for web
applications</li>
    <li>Developed the main feature of the system and integrate
them into the whole system</li>
</ul>
<p>Skills: Selenium, Java</p>

```

CSS

```
html * {
    font-family: Arial;
}

h2 {
    color: lightgreen;
}

h4 {
    color: blue;
}
```

Result

Lê Huỳnh Thiện

Junior Frontend Developer

343/25 Sư Vạn Hạnh, phường Hoà Hưng, TPHCM
(+84) 853826638
lehuynhthien05@gmail.com

Skills

HTML, CSS, JavaScript, Accessibility, Figma to Design, Responsive Web Design, Technical Writing, Presentation

Education

International University, VNU HCMC, BSc. Computer Science

August 2023 to August 2027

GPA: 3.60/4.00

Google Developer Groups - at International University

Advisor

Experience

Company A, Hoa Hung Ward, HCMC - Back-End Web Developer

February 2026 to June 2026

- Developed and built the business logic for the whole system
- Optimized website performance

Skills: Typescript, Javascript, Java - Springboot

Company B, Tan Hoa Ward, HCMC - Fullstack Developer

September 2026 to January 2027

- Assisted in the development and execution of automated test scripts
- Assisted in running automated tests in a CI/CD pipeline
- Conducted functional and smoke testing for web applications
- Developed the main feature of the system and integrate them into the whole system

Skills: Selenium, Java

Across the Internet

Github Link: github.com/lehuynhthien05

Explanation

- We use the tag **heading 1** for my name; some subtitles use **heading 2 or heading 4**
- The information in the subtitles uses the tag **"paragraph"** to mark the boundaries between the information
- On the last page, we use the tag **"a href"** to link to my **GitHub**. It is the storage that we can use to store our code or some files.
- In addition, we use the style.css file to customize the HTML file, such as the color of the heading, etc.

Question 2

Code

```
create table student(
    studentId   int primary key,
    studentName varchar(50) not null,
    dob         date        not null,
    major       varchar(50) not null,
);

create table student_course(
    courseId  int not null,
    studentId int not null,
    primary key (courseId, studentId),
    foreign key studentId references student(studentId)
    foreign key courseId references course(courseId)
);

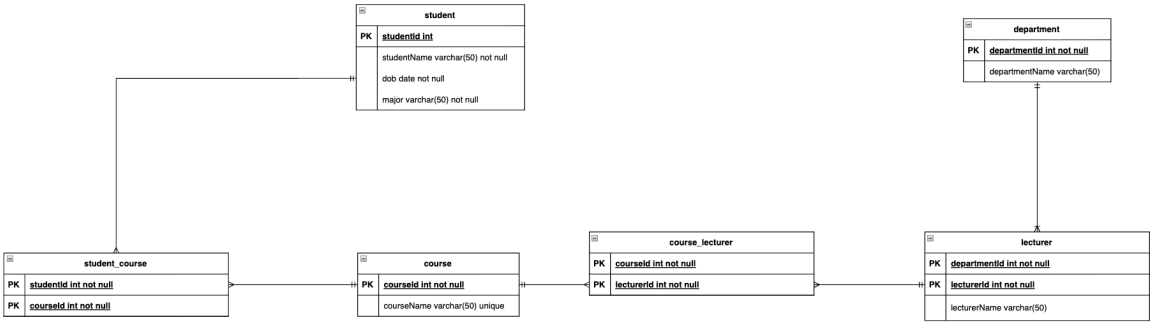
create table course(
    courseId   int primary key not null,
    courseName varchar(50) unique,
);

create table lecturer(
    lecturerId   int primary key not null,
    lecturerName varchar(50),
    departmentId int             not null,
    foreign key departmentId references department(departmentId)
);

create table course_lecturer(
    lecturerId int not null,
    courseId   int not null,
    primary key (lecturerId, courseId),
    foreign key lecturerId references lecturer(lecturerId),
    foreign key courseId references course(courseId)
);

create table department(
    departmentId   int primary key not null,
    departmentName varchar(50)
);
```

Result



Explanation

- In the database design above, I will check the normalization of the original database design, and I redraw it like this.
- I divide the tables that have many-to-many relationship to make it clearer
- In SQL code, I make it clear that I check the constraint for the attributes that it is **UNIQUE** or **PRIMARY KEY**
