Available for work

Huynh Thien Le

Full Stack Developer

I build scalable web applications with focus on performance and user centered design.

Download Resume

About Me

My journey into technology began as a backend developer. Later I discovered web development and fell in love with building interactive products.

Today I build modern applications using React, Java Spring Boot, and cloud infrastructure (AWS).

Expert Creative Partner

Projects

I learn all frameworks from the online course and apply into my project. I have experience in Java, HTML, CSS, JavaScript, ReactJS, Java Spring Boot, MongoDB and MySQL. I am also familiar with Git and GitHub for version control.

My Projects

TryClothApp
User can try the cloth before purchasing to bring the convenience for customer when they do not know that cloth is suitable or not for them.

Parking Booking System
User can find and book the slot for their vehicle when they go out. In addition, they can find the shortest path from their locations to the nearest the parking lot.

IU Assistant
This application supports for students at IU university to find the teammate of their class that they are currently studying. Besides, they can review that teammate and rating him/her.

<https://github.com/lehuynhthien05/Project-PDM>

Discovery
Understanding your goals and audience.

Design
Creating wireframes and design systems.

Development
Turning design into functional product.

Launch
Testing and deploying the project.

Ready to start your next project?

Let's create something amazing together.
